FP 37477: Using Headsets with Polycom Phones

The trusted old Public Switched Telephone Network (PSTN), with its Analog lines, ISDN BRI, E1 or t1 lines, are gradually being replaced by IP telephony. An increasing number of businesses are using more modern and flexible SIP Trunks. The major telecom providers are fast phasing out the old PSTN functionality, and are moving customers to IP.

3CX - SIP Trunking Explained

Most Hosted PBX providers allow users to make calls on their desk phones, desktop softphone apps, and mobile phones. With the ability to make calls from anywhere with an internet connection, your workers can truly stay connected away from the office.
