Malaria during pregnancy is a major public health concern and an important contributor to maternal and infant morbidity and mortality in malaria-endemic countries.¹Pregnant women are particularly...

Treatment of Malaria in Pregnancy | NEJM

Malaria is a common parasitic infection in humans. Pregnant women are highly susceptible to malaria because of decreased immunity in pregnancy. Malarial parasite lodges itself in the placenta and causes syncytial necrosis. It causes thrombosis of the placental vessels leading to infarction.

Malaria in Pregnancy

Executive Summary. Over the past 10 years, knowledge of the burden, economic costs, and consequences of malaria in pregnancy has improved, and the prevalence of malaria caused by *Plasmodium falciparum* has declined substantially in some geographical areas. Furthermore, studies outside of Africa have increased the evidence base of *Plasmodium vivax* in pregnancy.

Malaria in pregnancy - The Lancet

Abstract. Human malaria has arguably affected more of human history than any other pathogen. Pregnant women have a higher risk of developing severe malaria as well as the risk of severe complications. We present a case of severe malaria in a pregnant patient from sub-Saharan Africa who was treated successfully with artesunate.

Severe Case of Plasmodium falciparum Malaria in a Pregnant ...

(PDF) Malaria in Pregnancy - ResearchGate

It could increase malaria in pregnancy which in turn reduce the efficiency of those women in economic activities, mostly, farming, buying & selling, predominant in the region. Thereby, reduced productivity and increasing poverty in that region.

Economic Implication of Covid-19 on Antenatal Care in ...

Background: Malaria in pregnancy carries a proven huge health burden; however, the economic challenges have not been properly evaluated in Nigeria. Methodology: The study was a descriptive cross-sectional hospital-based approach. A structured questionnaire was used to collect microeconomic data from pregnant women, on the medical and nonmedical cost of malaria to them.

The economic burden of malaria in pregnancy: a cross ...

Pregnant women are more likely than nonpregnant women to become infected with malaria and to have severe infection. The effects of malaria during pregnancy include spontaneous abortion, preterm delivery, low birth weight, stillbirth, congenital infection, and maternal death.

Malaria in Pregnancy: A Literature Review - ScienceDirect

Malaria in pregnancy was considered the main theme if the title contained any reference to both pregnancy and malaria (Table (Table2), 2), or if after reviewing the abstract, or main text if no abstract was available, malaria in pregnancy was found to be the main theme. The entries were then categorized (using the abstract or full content analysis if the abstract was not available) according to the following sub-topics of malaria in pregnancy (not mutually exclusive): epidemiology and burden ...

The Malaria in Pregnancy Library: a bibliometric review

Malaria Journal is aimed at the scientific community interested in malaria in its broadest sense. It is the only journal that publishes exclusively articles on malaria and, as such, it aims to bring together knowledge from the different specialties involved in this very broad discipline, from the bench to the bedside and to the field.

Malaria Journal | Home page

Epidemiology of malaria among pregnant women during their first antenatal clinic visit in the middle belt of Ghana: a cross sectional study. This study sought to document the current burden and factors associated with malaria and anaemia among pregnant ...

Malaria Journal | Articles

Most pregnant women at risk of for infection with Plasmodium vivax live in the Asia-Pacific region. However, malaria in pregnancy is not recognised as a priority by many governments, policy makers, and donors in this region. Robust data for the true burden of malaria throughout pregnancy are scarce.

Malaria in pregnancy in the Asia-Pacific region ...

Malaria in pregnancy increases the risk of maternal and fetal anaemia, stillbirth, spontaneous abortion, low birth weight and neonatal death. Infants born to mothers living in endemic areas are vulnerable to malaria from approximately 3 months of age, when immunity acquired from the mother starts to wane.

Protecting malaria high-risk groups

The severity of malaria in pregnancy is thought to be due to general impaired immunity plus a diminution of acquired immunity to malaria in endemic areas. Placental malaria occurs where Plasmodium falciparum -infected erythrocytes accumulate in the intervillous space of the placenta but may be rare or absent in the peripheral circulation.

Malaria in Pregnancy. Learn about Malaria in Pregnancy ...

A prospective hospital-based study was conducted from June 1984 to November 1985 in northern India to study the morbidity pattern of malaria in pregnant women. 78 pregnant and 22 non-pregnant women with malarial infection (60% Plasmodium vivax and 40% P. falciparum) were included in the study. The results were analysed according to period of gestation, parity and type of infection.

Clinical course of malaria in pregnancy — a prospective ...

Malaria infections are harmful to both the pregnant mother and the developing fetus. Malaria is associated with a 3–4 times increased risk of miscarriage and a substantially increased risk of stillbirth, and it disproportionately affects children younger than 5 years.

Malaria in early life - thelancet.com

Some studies on the effect of P. vivax infection in pregnancy have suggested that the infection is associated with maternal anemia, miscarriage, congenital malaria and preterm delivery, as well as with severe disease. [8 – 17] These studies were mostly done in Asia, and with some exceptions, [12, 18 – 20] were based on limited numbers or case reports, thus providing an incomplete picture of the overall burden and impact of P. vivax in pregnancy.

Burden and impact of Plasmodium vivax in pregnancy: A ...

In pregnant women, malaria can lead to severe anemia, spontaneous abortion (miscarriage), stillbirth, premature delivery, delivery of low-birthweight babies, and death. Women in their first pregnancy are most at risk. Parasites can be present in the placenta and contribute to maternal

anemia even when the mother does not appear to be ill.

Malaria in Pregnancy - Jhpiego

Pregnancy-associated malaria or placental malaria is a presentation of the common illness that is particularly life-threatening to both mother and developing fetus. PAM is caused primarily by infection with *Plasmodium falciparum*, the most dangerous of the four species of malaria-causing parasites that infect humans. During pregnancy, a woman faces a much higher risk of contracting malaria and of associated complications. Prevention and treatment of malaria are essential components of prenatal ca
