Horses might continue to enjoy winter grazing on areas that farm owners “rested” to make way for dense regrowth in late summer and early fall. “In the South, ‘stockpiling’ 6 to 8 inches of pasture...

### **Winter Horse Pasture and Paddock Management - The Horse**

The primary energy or calorie source for horses is hay or pasture (i.e. forage and fiber sources). During the winter, if pasture grass is limited, you need to supplement a whole lot more calories in the form of hay. Always start with hay When you’re mapping out your horse’s winter diet, hay must always come first.

### **Winter Hay 101: How Much to Feed Your Horse (And Why)**

Horses kept outdoors during the winter should be allowed to grow a natural and full winter coat. A thick, dry coat of hair is an excellent insulator and their first line of defense against cold temperatures. Horses living outside should have access to adequate shelter from weather. Trees and three-sided sheds or stables are great options.

The non-profit is aiming to raise \$7,500 to cover the cost of hay and grain for the estimated six months of winter. A donation of \$5 will provide a day's worth of food for one therapy horse.

### **Help feed therapy horses over the winter**

During cold months, the horse's digestion converts feedstuffs into energy that results in body heat. This process is critical to winter survival. As animals switch from moisture-rich grass to drier hay, water consumption is important not only for hydration but also to keep feed moving through the digestive tract.

### **Winter Watering Options for Your Horse Farm | Horse Journals**

After a couple serious frosts it becomes sweet, has more sugar, tastes great and provides excellent nutrition all winter. Horses can founder on it all winter but after it is grazed down, it does not grow back until spring. In Florida, the Bahia grass is nutritious in the summer, but, though green looking in winter, has little nutritive value.
