Concepts of Programming

In java, Strings are defined by wrapping regular letters/numbers/special characters in quotes (" "). Again, that's just the syntax that Java uses. The last part of this syntax, is the part that marks this particular code segment as being complete. In Java, we use the semi-colon (;) to mark a part of our code as

Java comments are notes in a Java code file that are ignored by the compiler and runtime engine. They are used to annotate the code in order to clarify its design and purpose. You can add an unlimited number of comments to a Java file, but there are some "best practices" to follow when using comments.
