As the Iometer User's Guide says, Iometer is an I/O subsystem measurement and characterization tool for single and clustered systems. It was originally developed by the Intel Corporation and announced at the Intel Developers Forum (IDF) on February 17, 1998 - since then it got wide spread within the industry.

Iometer project

This will install Rasa Open Source as well as spaCy and its language model for the English language. We recommend using at least the "medium" sized models (_md) instead of the spaCy's default small en_core_web_sm model. Small models require less memory to run, but will somewhat reduce intent classification performance.
